*Claim Rejections - 35 USC § 112*

Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for determining an optimum set of values for tie-line flows and charges for all regions served by said tie-line flow control system for the at least one selected time interval, where the determination of the optimum set of values is substantially accomplished by minimizing a mathematical expression relating

deviations between the tie-line flow created by control area and the tie-line flow created by all the inter-regional transactions,

a charge related to (a) the price of tie-line flow control by the (b) the price of tie-line flow control,

and a benefit (negative charge) related to the use of tie-line flows paid by all the inter-regional transactions

it does not reasonably provide enablement for other minimization algorithms. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the system claims the limitation "at least some" renders the claim indefinite in scope. It is not clear what instructions are being claimed. The examiner suggests language to the effect of "said processor being programmed with a instructions to perform the following"

Also, in the claims a "benefit" is indefinite in scope.

Also, it is not clear how claims 3-6 further limit the system.

Claims 1-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
